

The PopupAutoClose 1.0 action.

1. Open the document that will go into the popup window.
2. Drag a head action object from the “smart object/set” tab of the “objects” palette to the head section of your document.
3. Highlight/select the head object.
4. Enter the delay (in seconds) in the action inspector.
5. Make sure that the action is set to execute “OnLoad”
